

Fernwood Health Group

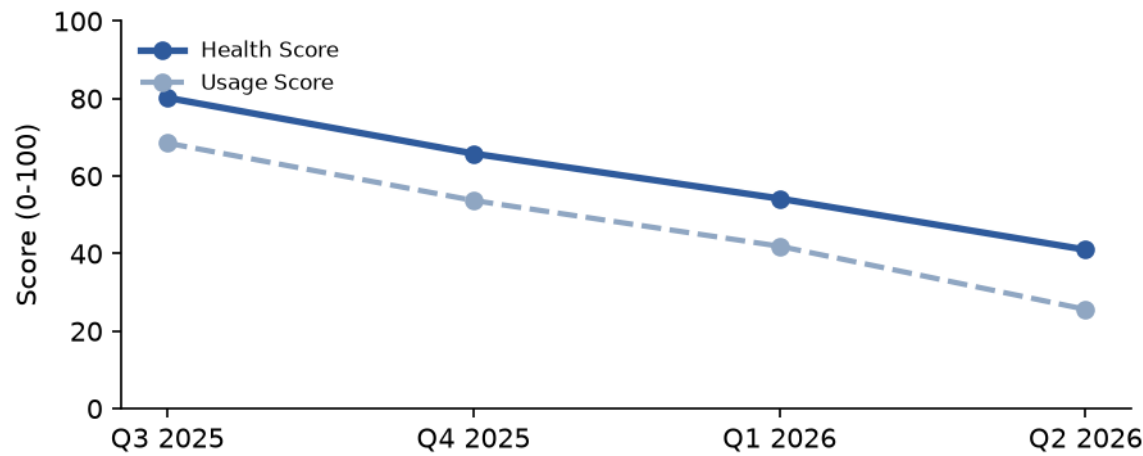

Quarterly Business Review | Q2 2026 | CSM: Melissa McGowan

ARR	Segment	Health Score	Health Band	Renewal In
\$96,000	Enterprise	41 / 100	At Risk	45 days

Executive Summary

Fernwood Health Group requires immediate attention. Health score has dropped 39 points over the last four quarters, moving the account into the At Risk band. This QBR should focus on a recovery plan, not a standard business review.

Health & Usage Trend (Trailing 4 Quarters)

Wins

- ✓ Adopted the reporting/analytics module after Q1 enablement session

Risks

- No executive sponsor engagement in over 150 days
- Key integration has been broken/unused since last quarter

Recommended Next Step

Address the top risk factor directly with the account before discussing renewal terms. Consider a mid-cycle check-in rather than waiting for the QBR. Renewal is in 45 days -- treat this as time-sensitive.
